MISSOURI DIRECTORIES at Mid-Continent Public Library - Midwest Genealogy Center – Revised October 2016

State City or region Years covered Format Call number / Location

INTRODUCTION

This is a list of Missouri city directory holdings for the Midwest Genealogy Center. The list includes Phonefiche, microfiche, microfilm, and printed directories. An effort has been made to make this list as comprehensive and accurate as possible. However, dates may be incomplete for old microfilm holdings. Dates do not always sort in perfect order. Some telephone books did not spell all town names correctly!

Format Notes:

Directory—Printed directories are found in the City Directories area of the library. The books are alphabetical by state and then alphabetical within the state by city. Directories have been cataloged in the library’s online catalog (<http://www.mymcpl.org/catalog>). To locate a directory use the online catalog or this list.

Fiche—Microfiche beginning with a call number UMI LH... are part of the UMI’s Genealogy and Local History collection. This collection has been cataloged in the library’s online catalog (<http://www.mymcpl.org/catalog>). To find a call number, use the online catalog or this list.

Phone Book—This collection of printed white or yellow pages is found in the City Directories area of the library. Currently, the telephone books have not been cataloged in the library’s online catalog. The books are arranged alphabetical by state and then alphabetical within the state by city. If more than one city is listed on a phone book, the book will be listed by the first city listed (generally the largest city) or the title of the phone book. The other cities listed on the phone book cover have also been added to this list. Under call number/location, it will give you the name of the phone book in which that city/town was listed.

Phonefiche—A collection of microfiche copies of telephone books from all over the United States arranged alphabetically by state and then by city. “y” is for yellow pages and “w” is for white pages. Currently, the Phonefiche have not been cataloged in the library’s online catalog. Alabama through Kentucky is located next to the Family History Library microfiche and Louisiana through Wyoming is kept in storage. Please ask a staff member for assistance.

Database—Several collections of city directories are included in the library’s databases and are indexed and searchable by name. Ancestry Library Edition and Fold3 are for in-library use only and can be accessed in any MCPL branch.
